Entrepreneurial & Financial Innovation Leadership to Achieve the UN SDGs

3/17/2017
FRIDAY

8:30am @ Salvation Army
221 East 52 Street

Participate in this interactive session to ensure your projects are financially sustainable.

Peace Boat US, in partnership with C4 Capital For New Commons (C4), Grassroots Academy Tohoku (GAT), and Women’s Eye (WE) will feature leaders around the world who are transforming the role of women and girls across industries to achieve the UN SDGs through technology and financial innovations. As a participant, you'll have an opportunity to pitch your ideas and receive feedback from panelists and peers in the room.

The role of women and girls in the areas of STEM and finance is transforming the work force dynamics, business models, and creative solutions. We will showcase four women-led organizations who are changing the status quo in communities and business places. By sharing innovative BOP and partnership solutions in business, finance, and community organizing, we can accelerate change through the UN CSW and support females who are helping achieve the UN Sustainable Development Goals (SDG).
